Subject: CASQA workshop: monitoring, evaluation, tracking, reporting

Greetings:

I see from the CASQA conference schedule, we'll be running this workshop on Weds, October 17.
I figured I'd check in with you all on your preparations and clarify the schedule.

The conference schedule for Session 2 does not quite follow Dave's proposed session structure (below) from his July 9th email:

Session 2: 60 min.

MS4 Monitoring, Evaluation, Tracking and Reporting Workshop: Learning from Experience to Improve Local Capacity and Permitting Approaches? (Matt Fabry, San Mateo County, moderator)

Workshop Overview: Learning from Experience to Improve How We Evaluate and Track Program Progress (**Seth Brown**, WEF Stormwater Institute, 10 min)

Recommendations for Evolving Monitoring, Evaluation, and Reporting Approaches (Dominic Roques, Central Coast RWQCB/ Chris Minton, Larry Walker Associates), 10 min talk, 25 min audience discussion)

Synthesis- What are the key actions we can take to improve capacity/permitting approaches concerning specific program elements? (Tom Mumley and Moderator, 15 min)

Seth is not listed on CASQA's conference schedule, and I think I've been moved into that slot. If so, please confirm and I'll start asking more questions to prepare (☺); otherwise I'll do the combo with Chris as indicated in Dave's proposed schedule, and Dave or Matt can to the Workshop Overview?

Thanks,

Dominic Roques, P.G. | Senior Engineering Geologist | Stormwater Program Manager
Central Coast Water Board | 895 Aerovista Place, Suite 101 | San Luis Obispo, CA 93401
